

# **Vendor Notice**

## **Under Ground Electric Phase # 2**

For our vendors on South Road and the East side of Commercial Dr. the Electrical change for 2011 (Phase #1) was a welcome change and resulted in very few problems being reported. The overhead electric went away, the poles that were always in the way are gone and six (6) new 100Amp stations now exist. We started Phase #2 soon after last years Fair and now can report that it also is complete. Phase #2 includes new lighting along Commercial Drive and new power stations on the West side of Commercial Drive. With the Phase #2 electrical change we have eliminated Track Side Drive. **Track Side Drive no longer will be used for Vendor set up.** The elimination of Track Side Drive will now concentrate the people traffic in two (2) areas, one being the South Road and the second Commercial Drive. We feel that with this change more people will be exposed to our Vendor areas. Traffic concentration will now be from the Main Gate (#5) to Sawmill Drive and from Gate (#3) West to the Grandstand. Vendors will now be located on the East and West side of Commercial Drive extending from the South Road to Saw Mill Drive at the North side of our grounds. **All previous Vendors (2011) that were located on Track Side Drive will be relocated to Commercial Drive and will be given priority consideration for their location.** We hope these changes meet with your approval and make things easier for all. A map showing the new road arrangement will be available.
